

America! She's My Country

© 2011 by [Terry Sasek](#)

She is despised by some and she's loved by others
She has always aided other countries when needed
Her young sons and daughters responded to the call
And though many call her names! She's My Country

All throughout our history we have been a leader
In industries that helped advance all countries
With our research & developments in medicines
She's improved the lives of many! She's My Country

It's strange how some nations we helped reject us now
And in some cases they have become our enemies as well
Using the technologies we gave them for war not peace
Then they will talk trash about her! She's My Country

Well say what you want and tell me she's just evil
But I'll tell you this fact there is no other lady
Who will think of others needs before her own needs
She's strong and she's very proud! She's My Country
