22. Local Villager building on to house - Phu Cat 1968: This photo started as the most used one I had . It had cracks tape marks and holes all over it. Incidentally it was taken from a "house" on the Phù Cát Strip, while waiting for some ROK Tiger Div. (troops tore up the house). The old man in the photo would go out and fill the two baskets and bring back to fill in the water hole.

25. Cobra Flight Sniper - I took this photo late one night at Phù Cát from the balcony of the barracks, looking toward the armory. It shows a member of cobra flight heading out on ambush. The original photo was rather foggy but I cleaned it up as much as possible.

26. Tunnel Rat - Photo taken near MISSOURI mortar pit. On a day off three of us checked out some area nearby. Besides tunnels we also found old Buddhist temple.

27. View North, from Hill 54 - Practice fire with mortars from Hill 54. Area below smoke on right (Charlie Island). Phù Cát received first rocket attack during Tet 1968. I was on Hill 54 and witnessed the midnight celebration of the start of Tet. Rather bizarre to see in all directions tracer rounds fired into the sky.
