

## **Time Out**

*Silloquoy*

Have you ever wondered how time and heavens are intertwined,  
and broader than Alpha and Omega?

A Timeline of eons back to Alpha's Big Bang, in search of where it all began—  
center of all ends.

A point that is real and ongoing,  
where movement is drawn along a timeline-forward,  
in search of Pi's never-ending-end?

Beyond Omega's Heavenly span...  
Run, walk it matters not, a timeline where any dot may harbor another Big  
Bang...  
poised... coiled...  
biding time to spawn the center to endless another.

A lone Alpha dot on the line;  
universal-catastrophic, igniting a new eternal universe;  
360 outward from every point of a global-spherical flaring to the Omega;  
each point an end of time, not space, pushing nothing ferociously beyond,

Alpha—the beginning, and center to all ends—ever expanding, flinging  
matter, and every moment a new Omega, then the search yet to begin.
