# AGENT ORANGE: Were You Killed in Vietnam?

© 2011 by Don Poss (VSPA.com)

That question requires a second read:

***Were you Killed in Vietnam?***

How many of our brothers do you know who suddenly died of Agent Orange diseases? Their names will never appear on The Wall, and yet they too were Killed in the Vietnam War as surely as every Combat Killed in Action or Line of Duty Death in Vietnam and Thailand.

Most Vietnam Veterans survived Vietnam; 58,220 did not. How many more are on borrowed time?

The number of deaths from exposure is five times greater than the names on the Vietnam Veterans Memorial (The Wall) in D.C. and growing yearly.

*Network President Jenny LeFevre, Agent Orange Victims and Widows Support Network, attributes more than 250,000 deaths to Agent Orange, a toxic herbicide the U.S. military sprayed over Vietnam from 1962 to 1971.*

*We Take Care of Our Own*
