

Why PTSD?

PTSD

22 veterans kill themselves daily in the United States. Why?

What did they see at war? Why does it still bother them after all this time? Why couldn't they just forget about it? Why didn't they tell someone something was seriously wrong? Why didn't they seek help?

8,030 die every year? Do they leave suicide notes saying why? How long has this been going on? Why isn't someone doing something about it? Can't someone tell all the veterans to call someone for help? Why hasn't the media told us loud and clear about this? Whose fault is for letting it go on and not stopping it?

This is terrible! What can I do? Who can I call or write to?
