

## VIETNAM

Biên Hòa Air Base - 1971-1972

3rd Security Police Squadron

© 2003 Tape Recording by [Kerry Tolan](#)

I recently rediscovered a 30-year old cassette tape where I recorded several of the rocket attacks at Biên Hòa in 1972. As I had a recorder literally strapped to my leg during patrol, these recordings capture some pretty close hits. I have (after several splices) digitized the tapes into wave files - the sound quality was in remarkably good condition. I am now in the process of editing the wave files prior to reformatting them into mp3 files. All files contain on-going radio chatter that itself is fascinating to listen to.

*Click on the MP3 file, then when your Player pops up, click on the Start Arrow.*

There are three files belonging to this attack, representing three separate waves. I've captured the following base attacks:

**1. Rocket Attack from Delta 1 (ramp sentry) -**

<http://www.vspa.com/mp3/bh-delta-one-1-first-wave.mp3> (651k)

This includes the distinctive sound of rockets being launched in several waves (and my running like hell for cover). Several close-in hits that overloaded the microphone. This is from my walking post (call sign - Delta One) on the flight line.

Of interest is that I caught the actual launch sounds in the next two [Second and Third] waves. Also, this series of tapes represent the recordings of very close impacts—enough so to overload the microphone. This file catches the general radio chatter.

**2. Bien Hoa Delta-1: Second Wave:**

<http://www.vspa.com/mp3/bh-delta-one-2-second-wave.mp3> (252k)

**3. Bien Hoa Delta-1: Third Wave:**

<http://www.vspa.com/mp3/bh-delta-one-3-third-wave.mp3> (276k)

**4. Rocket Attack from Police-5 (main gate):**

<http://www.vspa.com/mp3/bh-police-five-rocket-attack.mp3> (370k)

As the impacts didn't overload my microphone, this is the best rendition of 122s hitting home. These recordings were made possible by having a cassette player strapped to my leg during my duty hours. If something happened (and I wasn't too terrified), I'd slap the record-button. This particular file was recorded at Biên Hòa's main gate (call sign - Police Five), probably in 1972, and presents the clearest sounds of 122mm rockets impacting, as they were far enough away to not overload my microphone. It also demonstrates my first dropping my helmet, then my magazine, as I fumbled to load my M16 . . . *heh-heh*.

## 5. Bullseye-7 (bomb dump tower)

<http://www.vspa.com/mp3/bh-bomb-depot-exploding.mp3> (1085k)

1. **Photo above:** During flight line and bomb dump sapper attack, a barracks was cut in half by a 122mm rocket. Just after the rockets hit, you can hear an aircraft exploding in the distance and my deploying slap flares.

Confusion in the barracks with repeated explosions as the bomb dump explodes. Over the next few days I will be editing - primarily the Delta 1 recordings where there's several minutes between attacks. I will also carry archive files of "raw audio" which will be rather lengthy. Until I convert these to mp3, I've no final idea on their size. I expect to have them ready in a few days.

This is the last file which records when sappers blew up the flight line bomb dump a few blocks down from my barracks. I woke up by being damn near blasted from my cot and hit the "record" button as I swung under the bed. The explosions are from the bombs themselves as they cook off.

**The following is an AFVN report the next day recounting the attack.** Bien Hoa AB: 3rd APS, Base Attacks sounds (MP3), by Kerry Tolan. 1971-1972.

The recording also captured audio of an apparent probe by VC along the perimeter, with the marine bunker frantically calling for mortar illumination and the sound of their M60 machine gun opening up. This is one in a series of 3 files.

## 5. Tower, Bullseye-7:

<http://www.vspa.com/mp3/bh-bullseye-seven-1-initial-shock.mp3> (508k)

This is the 5th of 8 files. It features the immediate aftermath of an attack with me up in a 20-

foot tower (call sign - Bullseye 7) in the Biên Hòa bomb dump. I'm busy dispensing slap flares. There's a revetment chock full of 250lb bombs behind me, and my comfort level is quite clear in the opening radio conversation.

## 6. Exploding Aircraft

<http://www.vspa.com/mp3/bh-bullseye-seven-2-aircraft-exploding.mp3> (226k)

This is the sixth of 8 files, and the second in the "Bullseye" series featuring the same attack. The neat thing here is that you can hear the rumble and pop of aircraft blowing themselves to bits from missile hits on the flight line - which is over a kilometer away. Radio chatter includes discussing the conflagration.

## 7. Sappers discovered by Marine, perimeter bunker

<http://www.vspa.com/mp3/bh-bullseye-seven-3-sappers.mp3> (230k)

Features where sappers are discovered by a Marine bunker down the perimeter. They call for illumination rounds from a 60mm mortar (call sign - Little Whiskey) and then opened up with their M60.

*We Take Care of Our Own*
